

# Secure On-Wall Kiosk

## DESIGN GUIDE

### The Challenge:

To provide a secure flexible digital signage solution while maintaining a sleek aesthetic to complement a variety of environments.

### Our Solution:

CHIEF's Impact On-Wall Kiosk provides a secure and flexible kiosk wall mounting solution that improves the aesthetic of any wall that it adorns. A depth-adjustable exterior frame allows for a range of displays to be used where the panel is mounted to the frame door for ease of serviceability and access to components once opened. LG's 55TC3D provides an intuitive and precise touch experience to bring a new dimension to your digital signage presentations. Driving the content, BrightSign's XT1144 offers a no compromise, immersive digital signage experience while the WS103WW wireless module allows for content to be updated and controlled wirelessly.

Product	Function
<a href="#">CHIEF Impact On-Wall Portrait Kiosk</a>	Depth-adjustable exterior frame that can be set between 3-5" to accommodate a wide variety of flat panel depths. Display stays mounted to swing frame when opened to provide full access to components and cabling. Hidden, passive cooling vents provide thermal management to the components within. Available to suit 49, 50 and 55" display sizes.
<a href="#">LG 55TC3D</a>	55" LED Full HD advanced 40 touch P-Cap touch technology panel which enables precise touch responses. 450 nit brightness covered by a 3-year 24/7 commercial warranty.
<a href="#">BrightSign XT1144</a>	BrightSign's most powerful H.265/H.264 4K and Full HD video engine with Dolby Vision and HDR10+ support, 4K upscaling and dual decoding of two 4Kp60 videos simultaneously. Serial, dual USB (type A and C) and HDMI 2.0a input options.
<a href="#">BrightSign WS103WW</a>	Embedded module that implements wireless and Bluetooth functions inside all BrightSign Series 3 and 4 players. It has an M.2 interface connection, supports 802.11a/b/g/n protocols and has a single antenna.
