

Multi-purpose Training Room DESIGN GUIDE

The Challenge:

To provide a multi-purpose space that can be used for training, video conferencing, meetings, seminars and presentations with technology that offers a seamless transition between the uses.

Our Solution:

A flexible multipurpose room use solution leveraging Vaddio ConferenceSHOT AV Bundle to provide a professional camera and audio conferencing mixer into a single USB 3.0 connection for ease of install and use with no external drivers required to be installed on the BYOD or in-room PC. Compatibility with all major UCC soft clients such as Skype For Business, Zoom, Webex and Google Hangouts adds to the simplicity of the solution. Simply connect your device to the USB 3.0 and HDMI cables and the technology in the room is ready for any training, meeting, seminar or presentation both near and far.

| Product | Function |
|--|---|
| Vaddio ConferenceSHOT AV Camera | Ideal for distance training rooms integrating a Pan-Tilt-Zoom (PTZ) camera with 10x optical zoom, 74° wide horizontal field-of-view and an audio-conferencing mixer into a single USB 3.0 device with compatibility with leading web UCC services. |
| Vaddio ConferenceSHOT AV Speaker | Designed for use with the ConferenceSHOT AV Conferencing System offering dual two-inch full range drivers with 20W integrated power amp. |
| Vaddio EasyMIC Ceiling MicPOD | Three unidirectional cardioid elements in a single pendant hanging enclosure provides ultra-wide 360° pickup coverage. Each microphone element is equipped with integrated echo cancelation and Digital Signal Processing for professional audio quality. |
| LG 65UH5C | 65" Ultra HD (3,840 x 2,160) commercial display panel with 500 nit brightness offering a whole new level of picture quality. Covered by a three year 24/7 commercial warranty. |
| CHIEF XTMIU | X-Large Fusion micro-adjustable tilt wall mount with a weight capacity of 113.4kg and VESA mount compatibility range of 100 x 100 – 1,070 x 600 mm. |
